Work Experience

Junior front-end Developer • Pharmily +

October 2021 - December 2021

- **Technologies:** JavaScript, CSS, Bootstrap, HTML, GitHub, AJAX, ReactJS,
- **Responsibility:** Entire front-end development (Applied design thinking process, assist in setup, configuring, maintaining tools and frameworks that improve developer productivity, produced wireframe design, handle continuous integration, applied web services REST protocol, raised UX scores by 70% and increased website visitors by 1500 the first month).

Software engineer• Skaehub Africa

May 2021 - August 2021

- Developed software applications and designed product architecture
- Testing applications using scripts and automation frameworks as well as development of sites and web applications with complex graphics.

Tools used: Python, HTML, CSS, ReactJs, Figma

Website consultant • Alface Tours And Travel

February 2021 - November 2021

- I worked for a major travel website as a website development consultant. I supported them in activities such as bug fixing, development of new features, and application maintenance. I worked on many different projects, where I had different responsibilities. With the aid of the team, I supported the client in designing and developing an entire web application. Also advised on user-friendly designs and clean code for high-performance operation.

Projects

Bon Vivant Travel And Art Website

Designed and developed both the front-end and the backend system of this travel and art website.

Designed the API's for the system

Did tests on the system as well as deploying and putting the system out

Pharmily+ E-commerce Website

- Redesigned website positively benefitting 1500 users monthly by applying UX/UI's best practices.
- Developed a responsive web design using JavaScript, CSS, with libraries such as ReactJS and frameworks such as Bootstrap.

MCARR FIX Native app

- Built app and UI components from prototypes and wireframes
- Used Native APIs for tight integration with both platforms – Android and iOS.
- Created front-end modules with maximum code reusability and efficiency.
- Implemented clean, smooth animations to provide an excellent user interface.
- Wrote automated tests to ensure error-free code and performance.
- Worked with third-party dependencies and APIs

Education

Jomo Kenyatta University of Science and Technology

2018 - 2022

Bsc. Mathematics & Computer Science, 2018 - 2022

Relevant courses: *Software engineering, Object-Oriented Programming, Artificial Intelligence, Algebra, Computer Networking*

Activities & Societies: *Jkuat Society of Engineering Students, Zalego Campus Ambassador*

Starehe Girls' Centre, Kenya Certificate of Secondary Education, 2014 - 2017

2014 - 2017

Relevant subjects: *Computer Studies*

Activities & Societies: *Presidential Awards, Computing Club*

Certifications

Full-stack Web Developer

February 2021 - May 2021

Google Cloud architect practitioner

May 2022 - September 2022

Recommendations

 Dr. Geoffrey Kiprop

Consultant, Population Services International

Sisco is intelligent, hardworking, and passionate about what she does. Her enthusiasm for software engineering comes through in the tasks assigned to her. Her upbeat personality and charisma enable her to interact and work with diverse people. I am excited to recommend and vouch for her.
